### Description

We are offering an exciting opportunity for a Security Manager to join our team in Troy, Michigan. The Security Manager will play a pivotal role in our organization, ensuring the safeguarding of our assets, employees, and operations. This role is engaged in a diverse range of functions including managing access control, utilizing Cisco technologies, firewall technologies, IDS, and IPS, and ensuring adherence to cyber security policies and strategies.

#### Responsibilities:

- Develop, implement, and manage security protocols and procedures to protect the organization from internal and external threats
- Utilize Cisco technologies for the establishment and maintenance of secure networks
- Implement and manage firewall technologies to protect data and network infrastructures
- Utilize Intrusion Detection Systems (IDS) and Intrusion Prevention Systems (IPS) to identify and prevent potential security breaches
- Conduct regular audits and vulnerability assessments to identify potential areas of improvement in the security infrastructure
- Develop and implement cyber security strategies and policies to ensure the organization's digital assets are protected
- Oversee authentication processes to ensure only authorized individuals can access certain information and systems
- Collaborate with the DevOps team to integrate security measures into the development and operation of software and systems
- Ensure compliance with NIST 800-53 security controls and standards
- Maintain up-to-date knowledge and certification in CISSP (Certified Information Systems Security Professional) for effective management of the organization's security infrastructure.

### Requirements

- Must possess a minimum of 7 years of experience in a similar role.
- Proficiency in Access Control and Cisco Technologies is required.
- Should have experience with Firewall Technologies, IDS, and IPS.
- Must have hands-on experience in Auditing and Authentication.
- Familiarity with DevOps processes is essential.
- Should possess a deep understanding of NIST 800-53 and Vulnerability Assessments.
- Must have the ability to conduct audits related to network security.
- Should have a strong background in developing and implementing cyber security strategies and policies.
- CISSP certification is mandatory.
- Must have excellent communication and leadership skills.
- Proven experience in managing a team of security professionals is required.
- Must be able to handle security incidents and provide timely solutions.
- Ability to stay updated with the latest security trends and technologies is needed.
- Must be willing to work flexible hours and be available for any security emergencies.
