

Software Developer (Remote Position)

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: \$51.46 to \$59.59 hourly
Employment status: Contract / Temporary

Description

We are offering a long-term contract employment opportunity for a Software Developer in the Financial Services industry, located in Firestone, Colorado. The successful candidate will contribute to the development and maintenance of key applications with a primary focus on backend development.

Responsibilities:

- Design, develop, and maintain web applications using various programming languages including PHP, Python, and C#.
- Deploy and manage scalable solutions on Azure Web Apps platform.
- Write, optimize, and maintain SQL queries, stored procedures, and database schemas.
- Collaborate with cross-functional teams to ensure seamless integration of front-end and back-end functionalities.
- Debug and troubleshoot issues, ensuring high-quality deliverables.
- Adhere to best practices for security, performance, and scalability across applications.
- Participate in code reviews and ensure adherence to coding standards.
- Provide technical expertise and guidance to improve architecture and development processes.
- Collaborate with our in-house development team to deliver robust solutions.
- Monitor customer accounts and take appropriate action.

Requirements

- Proficiency in Atlassian Jira is essential for managing projects and tracking issues.
- Demonstrated experience in Backend Development.
- Familiarity with Bug Tracking to identify, record and monitor bugs in software.
- Proficiency in C++ programming language for effective software development.
- Familiarity with GitHub for version control and collaboration.
- Understanding of AB Testing for optimizing user experience and improving software quality.
- Experience with Agile Scrum methodologies to manage and control software and product development.
- Knowledge of Ajax for creating asynchronous web applications.
- Expertise in API Development for enabling communication and data exchange between software systems.
- Proficiency in ASP.NET for server-side web application development.
